(54) Title: WIDEBAND COMMUNICATION METHOD

(57) Abstract: The invention relates to a communication method comprising: establishing a wideband communication link between a first device (11) and a second device (12), transmitting a first set of consecutive data bits from said first device to said second device by means of a first set of pulses, and transmitting a second set of bits from said second device to said first device at least partially simultaneously or at least partially interlaced with said first set of bits.
